PROFESSIONAL SUMMARY

Full-Stack Software Engineer specializing in Node.js backend architecture, React frontend development, PostgreSQL and MongoDB databases, and real-time WebSocket systems. Proven track record architecting and deploying production web platforms.

EDUCATION

Kwame Nkrumah University of Science and Technology

Jan 2025 - Present

Programme: MSc. Information Technology

University of Ghana

Sept 2019 - August 2023

Programme: Bachelor of Science in Administration, Accounting

WORK EXPERIENCE

Full-Stack Software Engineer (Contract / Freelance) | ThesisFlow

March 2026 – June 2026

- Developed a production multi-tier academic workflow management system using Node.js (Express), React (Vite), PostgreSQL, and Prisma ORM, implementing strict Role-Based Access Control (RBAC) across Students, Supervisors, and Department Coordinators.
- Implemented Socket.io event-driven WebSocket communication with isolated room channels (user, thesis, submission), enabling live feedback commenting, instantaneous status state transitions, and real-time unread notification badge updates across windows without manual page refresh.
- Integrated Cloudinary Cloud Storage API with Multer middleware for 25MB .pdf and .docx file uploads, combined with Google Docs Embedded Viewer fallback for seamless in-browser document previewing.
- Designed a relational PostgreSQL schema leveraging Prisma ORM, implementing indexed lookup fields, circular foreign key resolution, and institutional 8-digit unique index number generators.
- Deployed scalable backend REST API and WebSocket server on Render with cloud database connection pooling, and deployed React frontend to Vercel CDN with single-page application (SPA) routing rewrite rules.

PROJECTS

FantasyDuel GH — Fantasy Premier League (FPL) Peer-to-Peer Wagering Platform [View Code](#)

Tech Stack: React (Vite), Node.js, Express, PostgreSQL, Prisma ORM, Paystack API, TailwindCSS

- Official Premier League FPL Integration: Built a real-time data sync pipeline consuming official Fantasy Premier League (FPL) APIs to fetch manager squad lineups, live match points, and resolve 38 Gameweek fixture deadlines automatically.
- Real-Money Payment Gateway: Integrated Paystack API to process Mobile Money (MTN MoMo, Telecel, AT Money) and Card deposits & automated cash withdrawals for fantasy managers across Ghana.
- Atomic Wallet & Escrow Ledger: Engineered ACID-compliant PostgreSQL database transactions for wallet balance validation, entry fee deductions, instant duel cancellation refunds, and paginated transaction histories.
- Head-to-Head Duels & Custom Pools: Created 1v1 matchup duels and multi-manager private/public pools with custom invite codes, capacity locks, and live leaderboards.

CV Builder / *React, JavaScript, HTML, CSS*

[View Code](#)

[Live Demo](#)

- Developed a dynamic CV builder that allows users to input personal details, educational background, and professional experience to generate a printable CV.
- Designed a user-friendly interface with collapsible sections and dynamic list updates for Education and Experience entries.
- Added persistent storage functionality using localStorage to retain user data across sessions.
- Enabled PDF export functionality using the html2pdf.js library, allowing users to download their CVs.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java

Backend & Runtime: Node.js, Express.js, WebSockets, REST APIs, JWT Auth

Frontend Technologies: React.js, CSS, HTML

Developer Tools: Git, GitHub, Postman, CI/CD

Databases & ORMs: PostgreSQL, MongoDB, Prisma ORM

Additional Skills: Data Structures, Problem Solving
